Experience

Flutter Developer, MedCare App, Freelance
Los Angeles, May 2020 - Present
Developed an iOS and Android app for a pharmacy company that allows ability to chat directly to a pharmacists for medication advice. Built with the following features:

- Capability to login with email, Google, and Apple
- Backend built with Google Firebase and Cloud Firestore
- Ability to scan medication barcode with camera and save it locally
- Ability to look up doctor providers and local pharmacies using APIs
- Architecture built using Provider and BloC pattern
- Built-in security features like Two-Factor authentication

iOS Developer, Rental Contract Manager, Freelance
Amsterdam, March 2020
Developed an app that quickly generates a short-term lease that can be signed by tenant and landlord on the app.

- Generates a multi-page PDF contract with images
- Allows to take or select pictures
- Uses Core Data to save all data locally
- Allows digital signatures
- Uses Coordinator-Pattern

iOS Developer, Fantasy Football App, Freelance
Los Angeles, September 2019
Developed a demo project to test 6 logged-in users interacting with a fantasy football draft.

- Built with Google Firebase for login and backend data
- Allows up to six users to draft fantasy team

iOS Developer, Ultimate Movie Database, Personal Project
Los Angeles, May 2019
Developed an app that uses themoviedb.org API to get the latest films, and has the followings features:

- Ability to save your favorite movies
- Ability to wishlist movies you'd like to see one day
- Ability to search for movies and add them to favorites.

Customer Support Engineer, Exodus.io
Los Angeles, 2017-2018
Provided support to users of the Exodus blockchain wallet (cryptocurrency portfolio manager). At the highest volume, helped 100+ customers daily. Also created ten (10) tutorial videos.

Project Coordinator, Intomotion
Los Angeles, 2015-2016
In charge of daily operations for iPad application development. Responsible for answering phone calls and emails, obtaining equipment and supplies. Also in charge of Quality Control by testing every app on 200+ iPads. Coordinated delivery of 6,200 NFC-enabled LEDs bracelets with a supplier in China to be worn for a special client event.
